IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements NOT Met for

Hardy County Public Service District
South Fork Water System – WV3301611

We are required to monitor your drinking water on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. Between 1/1/2022 and 1/31/2022, we failed to submit the required samples as indicated below and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the required monitoring and the compliance period.

Required Monitoring	Compliance Period
3A, MONITORING, ROUTINE, MAJOR (RTCR) Valid Compliance Total Coliform Sample(s) Not Reported as Required	1/1/2022 to 1/31/2022

What happened? What is being done?

You are being sent this notice because during the month of January 2022 the Hardy County PSD did not follow the required schedule for the collection of bacteriological samples for its South Fork water system. A bacteriological sample was submitted as scheduled in February 2022 and the sample was absent of total coliforms. The District apologizes for the error.

For more information, please contact Connie Sherman, Administrative Assistant at (304) 530-3048 or the Hardy County Public Service District, Post Office Box 900, Moorefield, West Virginia 26836.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
